## Preface

### Передмова

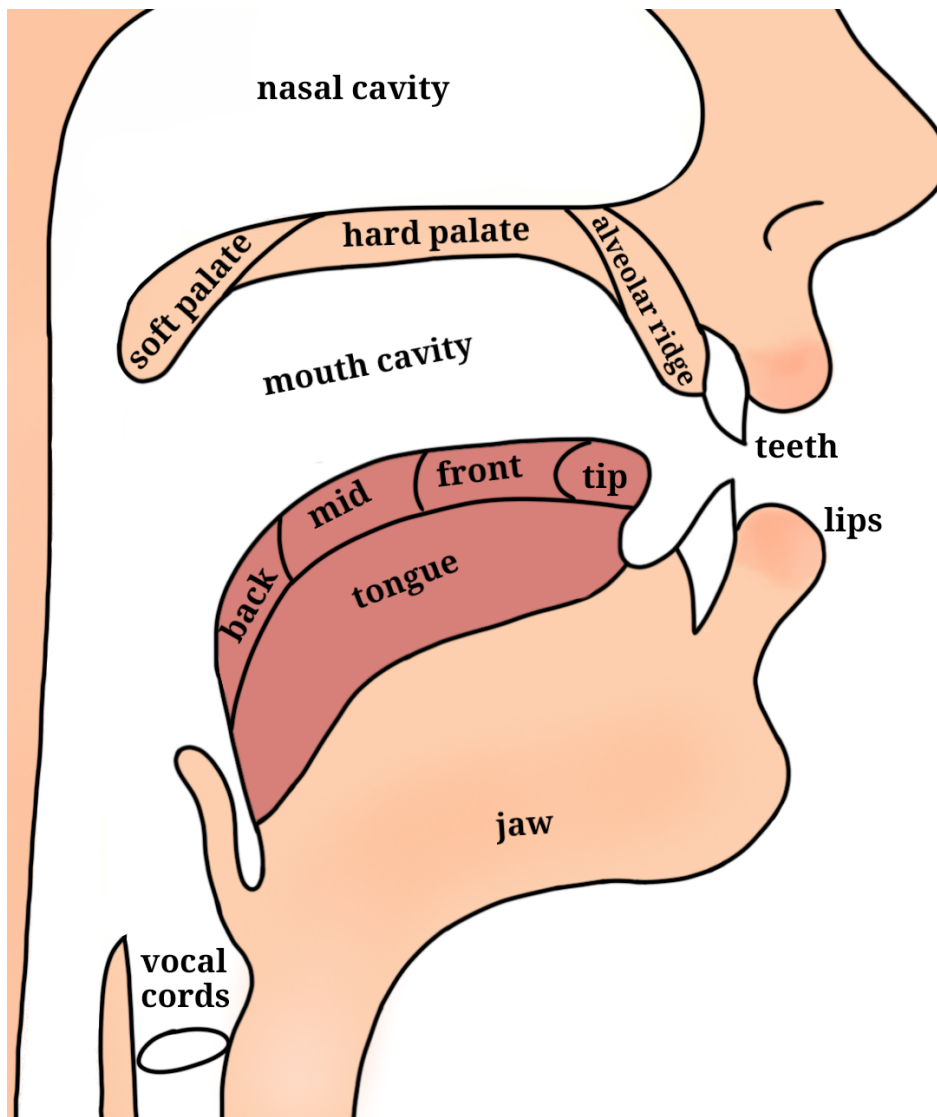

Щоб допомогти студентам першого курсу, що вивчають англійську як другу іноземну мову, в освоєнні фонетичної частини мови, були розроблені методичні рекомендації для настановно-корективного курсу фонетики. Актуальність розробки методичних рекомендацій зумовлена відсутністю ілюстрованого посібника-довідника з інструкціями щодо артикуляції звуків особливостей просодії в американському та британському різновидах англійської мови.

Навчально-методичні рекомендації з настановно-корективного курсу фонетики англійської мови розроблено для студентів I курсу першого (бакалаврського) рівня, які здобувають вищу освіту за напрямком підготовки 035 Філологія. У запропонованих рекомендаціях враховано основні положення робочої програми з другої іноземної мови (англійської). Рекомендації розроблено на основі системного підходу. Характерною особливістю навчально-методичних рекомендацій є аудіо- та візуальний супровід, спрямований на ефективне засвоєння фонетичного матеріалу.

Навчально-методичні рекомендації містять 60 мультипланових вправ та завдань, виконання яких сприяє формуванню у студентів фонетичної компетентності на сегментному та супрасегментному рівнях. Запропоновані рекомендації можна використовувати як на аудиторних заняттях, так і для самостійної роботи студентів.

# I Theory

## 1. Articulatory organs glossary

1. **alveolar ridge** /æɪ'viələ(r) rɪdʒ/ - **альвеолярний відросток/альвеоли**
2. **soft/hard palate** /sɒft/hɑ:(r)d 'pælət/ - **м'яке/тверде піднебіння**
3. **mouth/nasal cavity** /maʊθ/ 'neɪzəl 'kævəti/ - **ротова/носова порожнина**
4. **vocal cords** /'vəʊkəl kɔ:(r)dʒ/ - **голосові зв'язки**
5. **back/mid/front/tip of the tongue** /bæk/mɪd/frʌnt/tɪp əv ðə tʌŋ/ - **задня/середня/передня частина/кінчик язика**
6. **upper/lower teeth** /'ʌpə(r) 'ləʊə(r) ti:θ/ - **верхні/нижні зуби**
7. **upper/lower jaw** /'ʌpə(r) 'ləʊə(r) dʒɔ:/ - **верхня/нижня щелепа**

## 2. Vowel System

A **vowel**, in human speech, sound in which the flow of air from the lungs passes through the mouth with minimal obstruction and without audible friction; e.g., the *i* in “fit,” and the *a* in “pack.” Symbols that are used in transcriptions to represent a sound are called **phonemes**. There are 44 phonemes in the British variety of English and 40 in the American. The sounds that are produced by speakers (with different accents, dialects, articulation etc.) are called **allophones**.

Vowels are classified according to a front-to-back dimension. A **front vowel** is pronounced with the highest part of the tongue pushed forward in the mouth and somewhat arched. The *a* in “had,” the *e* in “bed,” and the *i* in “fit” are front vowels. A **central vowel** – tongue is positioned halfway between a front vowel and a back vowel as *u* in “cut”. A **back vowel**—e.g., the *u* in “rule” —is produced with the back part of the tongue raised toward the soft palate.

## 2.1. Front Vowel Articulation – practice 🖱️

(/ɪ/, /i:/, /e/, /æ/)

/ɪ/ as in 'hit', 'busy', 'swim' 🔊

1. Lift up the front part of your tongue, but do not touch the teeth.
2. Put your jaw down a little.

/i:/ as in 'key', 'people', 'eat' 🔊

1. Make your mouth wide, like a smile.
2. Lift up the front part of your tongue. It touches the sides of your upper teeth.

*/e/ as in 'pet', 'pen', 'head'* 

1. Make your mouth quite wide.
2. Push the back of your tongue down a little.
3. Put your jaw down a little.

*/æ/ as in 'cat', 'map', 'jam', in Am: 'after', 'class', 'fast'* 

1. Make your mouth wide.
2. Push the back of your tongue down.
3. Put your jaw down.

## 2.2. Central Vowel Articulation – practice 🙌

(/ɜ:/, /ə/, /ʌ/)

/ɜ:/ as in 'first', 'turn', 'work' 🗣️

1. The tongue is in the center (neither towards the back, nor the front of your mouth).
2. Lips are relaxed and stretched out a little.
3. The jaw is relaxed.

/ə/ only in unstressed syllables – as in 'water', 'about', 'America' 🗣️

1. The tongue is in the center (neither towards the back, nor the front of your mouth).
2. Lips are relaxed and stretched out a little.
3. The jaw is relaxed.
4. Pronounce the vowel very quickly.

**/ʌ/ as in 'cup', 'bus', 'come'** 

1. Press the tongue down.
2. Make your mouth wide, lips are relaxed.
3. The jaw is relaxed.

### **2.3. Back Vowel Articulation – practice**

(/ɑ:/, /ɒ/, /ɔ:/, /ʊ/, /u:/)

**/ɑ:/ - in Am instead of /ɒ/, /ɔ:/, as in 'dog', 'fog', 'caught'** 

**in Br: 'after', 'class', 'fast'** 

1. Push the back of your tongue down.
2. Put your jaw down.

**/ɒ/ in Br: 'bottle', 'not', 'hot'**

1. Put your lips forward a little.
2. Round your lips a little.
3. Push the front part of your tongue down, it moves towards the back of your mouth.
4. Put your jaw down.

**/ɔ:/ as in Br: 'call', 'talk', 'door'**

1. Put your lips forward.
2. Round your lips.
3. The tongue is flat and relaxed.
4. Put your jaw down.

**/ʊ/ as in 'book', 'look', 'cook'** 

1. Put your lips forward a little.
2. Round your lips a little.
3. Lift up the back part of your tongue a little.

**/u:/ as in 'group', 'too', 'blue'** 

1. Put your lips forward.
2. Round your lips.
3. Lift up the back part of your tongue.

## 2.4. Diphthongs

A **diphthong** is a combination of vowel sounds which form one syllable. In the **British variety of English** there are 8 of them:

/eɪ/	break, mail, cake 
/ɪə/	fear, deer, peer 
/ɔɪ/	toy, boy, annoy 
/aɪ/	high, eye, fly 
/eə/	care, wear, bare 
/ʊə/	pure, cure, fuel 
/əʊ/	road, mode, load 
/aʊ/	how, cow, town 

In the **American variety of English**, however, there are only 5 diphthongs:

/eɪ/	way, grey, stay 
/oʊ/	goat, soak, road 
/aɪ/	pie, dye, lie 
/aʊ/	loud, house, mouse 
/ɔɪ/	toy, joy, employ 

### 3. Consonant system

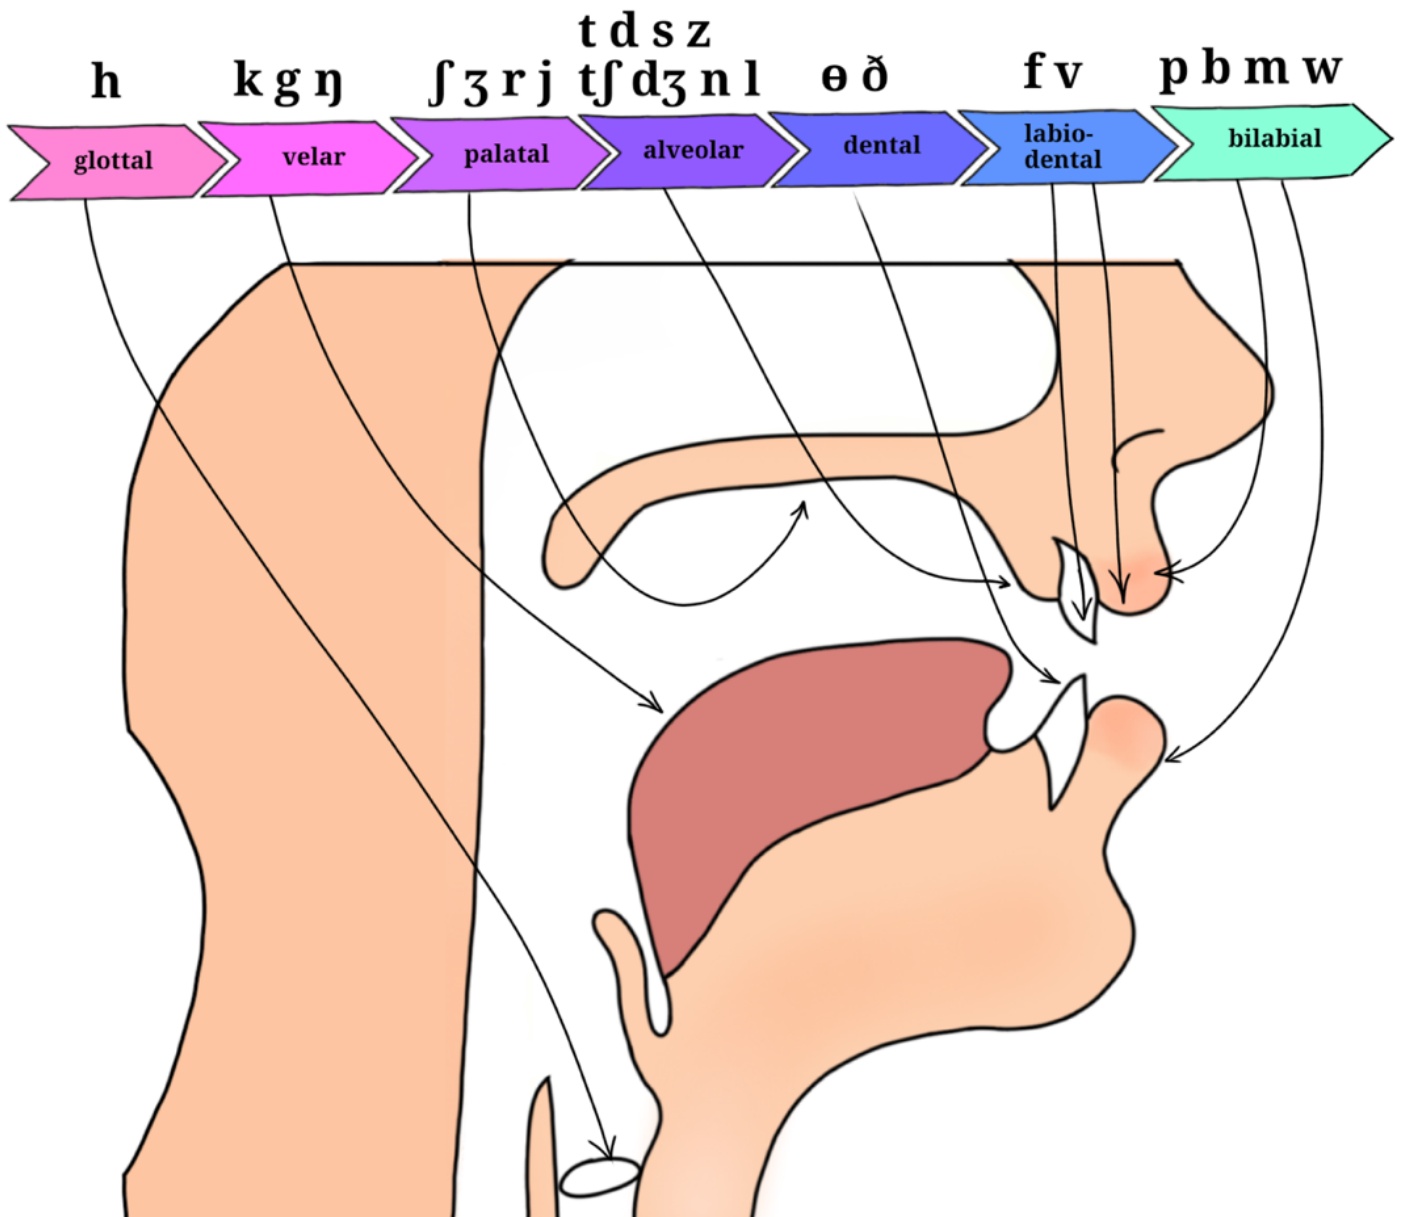

There are **24 consonant sounds** in English.

Consonants are classified according to:

- ➔ **Voicing** – the work of the vocal cords (voiced/voiceless)
- ➔ **Place of articulation** – where the articulation takes place (bilabials/labio-dentals/dentals/alveolars/palatals/velars/glottal)
- ➔ **Manner of producing noise** – how the air passes (plosives/ fricatives/ nasals/ affricates/ approximants)

	bilabials		labio-dentals		dentals		alveolars		palatals		velars		glottal	
Voiceless -v Voiced +v	-v	+v	-v	+v	-v	+v	-v	+v	-v	+v	-v	+v	-v	+v
<b>Stops (plosives)</b>	p	b					t	d			k	g		
<b>Fricatives</b>			f	v	θ	ð	s	z	ʃ	ʒ (palato-alveolar)			h	
<b>Affricates (plosive + fricative)</b>							tʃ	dʒ (palato-alveolar)						
<b>Nasals</b>		m						n				ŋ		
<b>Approximants (partial block of air, vowel-like)</b>		w					r	l		j				

### 3.1. Consonants according to the place of articulation

- **bilabials** /baɪˈleɪbiəlz/ - губні приголосні
- **labio-dentals** /ˈleɪbiəˈdentəlz/ - губно-зубні приголосні
- **dentals** /ˈdentəlz/ - зубні приголосні
- **alveolars** /əlˈviələ(r)z/ - альвеолярні приголосні
- **palatals** /ˈpælətəlz/ - піднебінні приголосні
- **velars** /ˈvi:lə(r)z/ - задньоязикові приголосні
- **glottal** /ˈglɒtəl/ - гортанний приголосний

### 3.1.1. Bilabial articulation – practice 📌 (p, b, m, w)

/p/ as in 'pin' 🔊

1. Close your lips hard.
2. Push air forward in your mouth.
3. Open your mouth quickly to release the air.

/b/ as in 'big' 🔊

1. Close your lips hard.
2. Push air forward in your mouth.
3. Open your mouth quickly to release the air.
4. There is vibration in the vocal cords.

**/m/ as in 'map'** 

1. Close your both lips together.
2. The air comes out of your nose.
3. There is vibration in the vocal cords.

**/w/ as in 'wall'** 

1. Put your lips froward.
2. Round your lips (as to blow a candle).
3. There is vibration in the vocal cords.

### 3.1.2. Labio-dental articulation – practice 📌 (f, v)

/f/ as in 'fine' 🗣️

1. Touch your front top teeth with your lower lip.
2. Blow out air between your lip and your teeth.

/v/ as in 'vase' 🗣️

1. Touch your front top teeth with your lower lip.
2. Blow out air between your lip and your teeth.
3. There is vibration in the vocal cords.

### 3.1.3. Dental articulation – practice 📌 (e, ð)

/e/ as in 'think' 🗣️

1. Touch the back of your upper front teeth with the tip of the tongue.
2. Push the air through the gap.

/ð/ as in 'this'

1. Touch the back of your upper front teeth with the tip of the tongue.
2. Push the air through the gap.
3. There is vibration in the vocal cords.

### 3.1.4. Alveolar articulation – practice 🙌 (t, d, s, z, tʃ, dʒ, n, l)

/t/ as in 'tip' 🗣️

1. Touch the alveolar ridge with the tip of your tongue.
2. Push air forward inside your mouth.
3. Move the tongue away quickly to release the air.

/d/ as in 'door' 🗣️

1. Touch the alveolar ridge with the tip of your tongue.
2. Push air forward inside your mouth.
3. Move the tongue away quickly to release the air.
4. There is vibration in the vocal cords.

**/s/ as in 'sit'** 

1. Touch your top teeth with the sides of your tongue.
2. Put the tip of your tongue forward to nearly touch the palate.

**/z/ as in 'zoo'** 

1. Touch your top teeth with the sides of your tongue.
2. Put the tip of your tongue forward to nearly touch the palate.
3. There is vibration in the vocal cords.

/tʃ/ as in 'chair'

1. Touch the alveolar ridge with the tip of your tongue.
2. Release the air by moving the tip of the tongue down a little, but nearly touch the palate with the front part of the tongue.
3. There is some contact between the tongue and the sides of the upper teeth.

/dʒ/ as in 'joy'

1. Touch the alveolar ridge with the tip of your tongue.
2. Release the air by moving the tip of the tongue down a little, but nearly touch the palate with the front part of the tongue.
3. There is some contact between the tongue and the sides of the upper teeth.
4. There is vibration in the vocal cords.

**/n/ as in 'nice'** 

1. Press the tip of your tongue against the alveolar ridge.
2. The air comes out of your nose.
3. There is vibration in the vocal cords.

**/l/ as in 'lamp'** 

1. Press the tip of your tongue against the alveolar ridge.
2. The air passes the sides of your tongue.
3. There is vibration in the vocal cords.

### 3.1.5. Palatal articulation – practice 🙌 (ʃ, ʒ, r, j)

/ʃ/ as in 'shy' 🔊

1. The tip of your tongue points upwards towards the palate.
2. There is some contact between the tongue and the sides of the upper teeth.

/ʒ/ as in 'beige' 🔊

1. The tip of your tongue points upwards towards the palate.
2. There is some contact between the tongue and the sides of the upper teeth.
3. There is vibration in the vocal cords.

**/r/ as in 'run'** 

1. Curl the tip of your tongue backwards.
2. Do not touch the palate with your tongue.
3. The sides of your tongue touch the inner sides of the upper back teeth.
4. There is vibration in the vocal cords.

**/j/ as in 'you'** 

1. Place the front part of your tongue under the upper teeth.
2. Do not touch the palate.
3. The air passes through a little gap at the top of your mouth.

### 3.1.6. Velar articulation – practice 📌 (k, g, ŋ)

/k/ as in 'cat' 🔊

1. Lift up the back of your tongue and touch the palate.
2. Push air forward behind your tongue.
3. Move the tongue away quickly to release the air.

/g/ as in 'get' 🔊

1. Lift up the back of your tongue and touch the palate.
2. Push air forward behind your tongue.
3. Move the tongue away quickly to release the air.
4. There is vibration in the vocal cords.

/ŋ/ as in 'song' 

1. Press the back of your tongue against the soft palate.
2. The air comes out of your nose.
3. There is vibration in the vocal cords.

### 3.1.7. Glottal articulation – practice (h)

/h/ as in 'hear' 

1. Lift up the back of your tongue.
2. The air comes through a little gap at the back of your mouth.

## 4. Intonation – practice 📌

➡ **Intonation** – is the combination of speech melody, sentence stress, rhythm, tempo and timber. This allows the speaker to effectively express their thoughts, desires, emotions, and perspective on reality and the things they are saying.

➡ **Speech melody (pitch)** – is the variations in the pitch of the voice (rising and falling on the stressed syllables and words). The pitch of the voice consists of **pitch level** (high, medium, low) and **pitch range** (the interval between the lowest and the highest pitch levels).

The pitch of the voice is determined by the frequency with which the vocal cords vibrate. The frequency of vibration of the vocal cords is determined by their thickness, their length, and their tension. By tightening the vocal cords, a person can raise the pitch of the voice; by loosening them, one can lower vocal pitch.

! **Low-pitch level** is used to express such emotions as **sadness, hopelessness, admiration, regret, reproach, sympathy, hatred** etc.

! **High-pitch level** is used to express such emotions as **anger, horror, fear, irritation, impatience, joy, joyful surprise** etc.

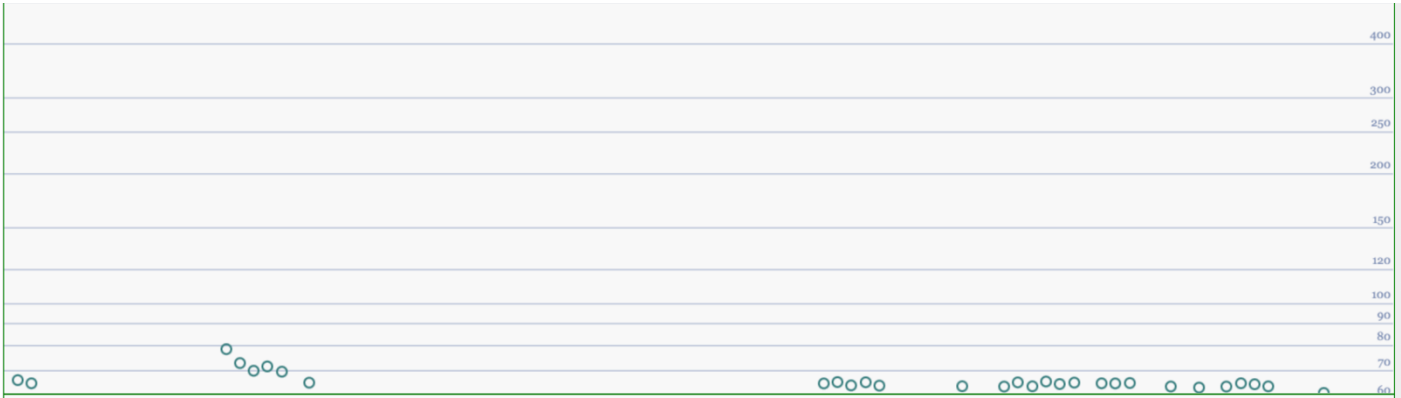

▶ **Watch the videos below and pay attention to the pitch the characters are using in the spectrogram. What emotions are they expressing? To watch a video – scan the QR code to the right of the video screenshot.**

**Warrior Nun (2020) S02E07**

[Scan me!](#)

**Low-pitch level** (pronunciation of the word "fantastic")

**Mythic Quest (2020) S01E03**

[Scan me!](#)

**High-pitch level** (pronunciation of the word "fantastic")

➡ **Sentence stress** – is louder and longer pronunciation of important words and weaker and faster pronunciation of less important words in the sentence.

! There are parts of speech that are normally **stressed** and normally **unstressed** in the English language. To learn what those are review the tables below.

Stressed	Examples
• <b>nouns</b>	<i>Peter, mother, book</i>
• <b>verbs/phrasal verbs (both parts)</b>	<i>to work, to look for</i>
• <b>adjectives</b>	<i>beautiful, gorgeous</i>
• <b>adverbs</b>	<i>absolutely, near,</i>
• <b>numerals</b>	<i>one, (the) second</i>
• <b>negative auxiliary verbs (short form)</b>	<i>isn't, doesn't, haven't</i>
• <b>negative modal verbs (short form)</b>	<i>can't, mustn't</i>
• <b>demonstrative pronouns</b>	<i>this, that, these, those</i>

Unstressed	Examples
• <b>pronouns (personal, object, possessive, reflexive)</b>	<i>I, my, theirs, him, herself</i>
• <b>auxiliary verbs</b>	<i>am, was, has, did, does</i>
• <b>articles</b>	<i>a/an, the</i>
• <b>conjunctions</b>	<i>and, or, but</i>
• <b>prepositions</b>	<i>to, at, in,</i>

➡ **Logical stress** – is giving prominence to a new/a contrasting element in the sentence. The word which is singled out by the logical stress is the most important (**the communicative center/logical center**) in the sentence. Any word in the sentence may become this communicative/logical center.

▶ Watch the videos below and pay attention to the logical stresses and how they change the meanings. *To watch a video – scan the QR code to the right of the video screenshot.*

You **did** it!

Doctor Who (2005) S12E04

[Scan me!](#)

You did it!

The Goldbergs (2013) S03E17

[Scan me!](#)

➔ **Rhythm** – is the change of stressed and unstressed syllables within a specific period of time.

To depict rhythm, rhythmic patterns are used. Where **○** – stressed syllables and where **o** – unstressed syllables.

 **Listen to the sentences below. Pay attention how the stressed syllables are pronounced the same and how unstressed syllables are pronounced faster in each following sentence to fall into the specific period of time (rhythm).**

OO

OoO

oOooOoo

ooOoooOoo

oooOooooOoo

ooooOooooooooOoo

ooooooooOooooooooooooOoo

**Sam, Pam.**

**Sam** and **Pam**.

**Samantha** and **Pamela**.

There's **Samantha** and there's **Pamela**.

Well there's **Samantha** and then there's **Pamela**.

Well first there's **Samantha** and then there's also **Pamela**.

Well first of all there's **Samantha** and then you know there's also **Pamela**.

➔ **Tempo** – includes the rate of speech and pausation.

**The rate of speech** can be slow, normal or fast. The most important words are pronounced slower and less important faster.

Sentences are usually separated from each other by **pauses**. If necessary, the sentence is subdivided into shorter word groups according to sense (**intonation groups, syntagms**).

➔ **Timbre** – is a special coloring of voice which shows the speaker's emotions such as pleasure, sadness etc.

## 4.1. Intonation in different communicative types – practice 📌

Intonation in speech is realized through **tones** (pitch patterns). **Pitch patterns** are the variations in pitch (rising or falling tones) that are used to convey different meanings or emotions. The **falling tones** convey finality, completion and are categoric. The **rising tones** convey incompleteness and are non-categoric. There are **simple tones** (pitch changes into one direction only: up or down) and **complex tones** (pitch changes into more than one direction: up and then down or down and then up).

Different pitch patterns can be used in communicative types of sentences in the English language.

**The communicative type of a sentence** – is a linguistic category differentiated in speech in accordance with the aim of the utterance. There are 4 types of them: questions, statements, imperatives and exclamations.

➡ **General questions** are most commonly used with the **Low Rise** ➡ pattern. They sound **genuinely interested**.

🔊 **Eg:** “Do you like to travel?” ➡

“Have you ever been to a music concert?” ➡

➡ **Special questions** are most commonly used with the **Low Fall** ↘. Such questions sound **serious, business-like**.

 **Eg:** “Why was the meeting postponed?” ↘

“What can we do in this situation?” ↘

! **But:** if the speaker wants **to show interest** in the matter and **to sound friendly and sympathetic**, the **Low Rise** ↗ is used ↗.

 **Eg:** “What is your hobby?” ↗

“Where did you go for your last vacation?” ↗

➡ **Alternative questions** offer several alternatives; each alternative creates a separate syntagm and has the **Low Rise** ↗ until the final one which has the **Low Fall** ↘.

 **Eg:** “Do you want pasta ↗ or pizza?” ↘

“Do you want your coffee white no sugar ↗, white with sugar ↗,  
black no sugar ↗ or black with sugar?” ↘

➡ **Tag questions** consist of two parts (syntagms): the 1st is a statement and it takes the **Low Fall** ↘; the 2nd is a tag and its pitch pattern depends on the meaning.

The **Low Fall** in a tag means that the speaker is not asking a question but rather seeks confirmation of the information. The speaker is **confident** in what they are saying.

 **Eg:** “You didn't hear my call ↘, did you?” ↘

“You were late again ↘, weren't you?” ↘

The **Low Rise** in a tag means that the speaker is **not confident** about their statement and is asking another person about it.

 **Eg:** “It is rather difficult ↘, isn't it?” ↗

“You are new here ↘, aren't you?” ↗

➡ **Statements** are most commonly used with the **Low Fall**. They sound **complete** and **definite**.

 **Eg:** "This is a difficult task." ↘

"I know her." ↘

! **But:** if the speaker wants **to sound friendly and encouraging** or use a statement **as a question**, the **Low Rise** ↗ is used.

 **Eg:** "It's all right" ↗

"You alright?" ↗

➡ **Commands** with the **Low Fall** are **very strong, serious** and **powerful**. The speaker is sure that others will obey them.

 **Eg:** "Hand it over to me." ↘

"Call our main client." ↘

! **But:** if the speaker wants **to rather suggest a course of actions, to sound lively and warm** or with **a note of critical surprise**, the **High Fall** ↘↗ is used.

 **Eg:** "Tell him exactly what you think!" ↘↗

"Do it now! Don't deprive yourself of this opportunity" ↘↗

➡ **Requests** with the **Low Rise** sound **soothing** and **encouraging**.

 **Eg:** "Come and visit us this weekend." ↗

"Join me." ↗

! **But:** if the speaker wants **to sound pleading**, the **Fall Rise** ↘↗ is used.

 **Eg:** "Give me another chance." ↘↗

"Lend me your hat, please" ↘↗

 **Exclamations** are very common with the **High Fall**. They sound **very emotional** (either positively or negatively), **surprising** or **protesting**.

 **Eg:** "What a great surprise!" 

"What nonsense!" 

**!** **But:** if exclamation is **not very exciting** or the speaker wants to convey **sarcasm**, we use the **Low Fall** .

 **Eg:** "Wonderful." 

"What a nice coincidence." 

## II Practice

### 1. Front Vowels – theory 🖱️ (/ɪ/, /i:/, /e/, /æ/)

#### 1. Listen and repeat.

/ɪ/ sound: 

**Words:** bit, kid, sit, grin

**Word combinations:** big hit list, kick the rhythm, flip the switch

**Sentences:** The little kitten bit my finger. This city is filled with quick and efficient transportation.

**Additional practice:** sit, fit, bit, ship, click, miss, lip, pick, hill, milk, sick, timid, fix, with, blink, lift, kick, myth, whip, skill

#### 2. Listen and repeat.

/i:/ sound: 

**Words:** bee, see, beat, team

**Word combinations:** green leaves, deep sea, sweet cream

**Sentences:** The busy bee buzzed by my head. The team is keen on winning the tournament.

**Additional practice:** bee, see, tree, sea, team, chief, belief, receive, deceive, sheep, beet, meet, key, peek, ski, free, peace, three, brief, niece.

#### 3. Listen and repeat.

/e/ sound: 

**Words:** bed, pen, mess, end

**Word combinations:** red bed, best vest, men sell shell

**Sentences:** The French chef dressed the salad with zest. The test was a mess and left the students feeling stressed.

**Additional practice:** bed, head, said, eight, vein, bread, when, red, pen, let, best, web, check, men, set, guess, edge, send, left, rest

#### 4. Listen and repeat.

/æ/ sound: 

**Words:** cat, hat, map, sad

**Word combinations:** black hat, mad dad, fat rat

**Sentences:** The man had a bad cold and felt sad. The cat sat on the mat and glanced at the fat rat.

**Additional practice:** cat, hat, rat, bat, mat, sat, chat, fat, pat, mad, glad, grab, sack, back, cab, jam, fan, add, snack, grant

## 2. Central Vowels – theory

(/ɜ:/, /ə/, /ʌ/)

#### 1. Listen and repeat.

/ɜ:/ sound: 

**Words:** bird, heard, word, served

**Word combinations:** dirty shirt, bird chirp, perfect world

**Sentences:** The world is full of words waiting to be heard. The girl stirred the curd and added herbs.

**Additional practice:** nurse, term, verb, her, bird, learn, curve, blur, sir, dirt, thirst, turn, word, turtle, worth, serve, birth, purse, stir, prefer

#### 2. Listen and repeat.

/ə/ sound: 

**Words:** sofa, pizza, camera, arena

**Word combinations:** rotten banana, crystal clear, comfortable sofa

**Sentences:** The pizza was topped with feta and extra mozzarella. The sofa was covered in velvet and had an uneven leg.

**Additional practice:** comma, about, happy, taken, pencil, camera, animal, happen, circus, system, button, rotten, lemon, minute, open, happen, desert, chosen, common, sugar

### 3. Listen and repeat.

**/ʌ/ sound:** 

**Words:** sun, fun, run, gum

**Word combinations:** one plus one, run to the sun, pumpkin cupcake

**Sentences:** The hungry young pup chugged his milk. He wondered why no one noticed the sound of the thunder.

**Additional practice:** cup, cut, under, fun, love, drum, such, come, run, duck, luck, sun, bug, hut, mud, supper, hunt, bunch, hum, tug

## 3. Back Vowels – theory
